

U.S. Department of the Navy

Office of the Assistant Secretary of the Navy (Financial Management and Comptroller)
The Honorable Richard Greco, Jr.

Success Story

Space and Naval Warfare Systems Center-Business Intelligence

ISSUE: What tools are available to strengthen efficiency and effectiveness of business analysts at Space and Naval Warfare Command Systems Center San Diego?

ACTION: Space and Naval Warfare Systems Center-San Diego implemented Business Warehouse in 2003 - providing access to business analysis tools through a centralized, easy-to-use interface.

RESULT: Business Warehouse provides aggregated views of business performance for high-level managers with intuitive graphical “cockpit” representations for a quick view of results.

The Business Warehouse provides data warehousing functionality and business analysis tools – for example - online analytical processing and data mining. This provides a foundation for accessing and presenting data, searching for patterns, and identifying exceptions.

The Business Warehouse implementation enabled Space And Naval Warfare Systems Center-San Diego to agilely and economically respond to quick turn-around Base Realignment and Closure Commission data requests, including the associated analytical effort, through its ability to merge data from the Enterprise Resource Planning system with other data from across the enterprise.
